## FOOD SAFETY POLICY

---

**Packaging Matrixx**, printers of specialty packaging products, fully conscious of the use of its products in the food and beverage industry, commits to undertake its operations in a manner that identifies potential food hazards and institutes controls to eliminate these hazards.

This we will do through ensuring:

- All Associates are appropriately trained and informed of relevant food safety information associated with products and for them to perform their respective responsibilities;
- GMP standards are maintained through clean and hygienic production environment, standards quality testing, clearly defined processes and well maintained documentation system;
- Product development and production are undertaken to meet specific quality criteria of customers;
- Monitoring of customer feedback and welcoming constructive suggestion to facilitate continuous improvements.
